

# Word and Excel Utilities

## Document Generation and Printing Solution

### Cheap, Fast and Powerful

The Word and Excel Utilities let you create templates in MS Office and merge the data in Progress.

- Save days on writing your programs by using MS Office to design your templates or downloading one off the internet
- Generate MS Office files in seconds compared to minutes with current technologies.
- There's no document you can imagine that you cannot create in MS Office and the Word and Excel Utilities.

### Design in MS Office Merge Data in Progress

You or your end users can design and make changes to your templates separately and without the need to make any changes to your code.

### Take Advantage of MS Office to Design your Documents

- Take advantage of the market leader for designing documents. Whether you're creating a sophisticated Word document, an Excel Pivot Table or Dashboard there's no document you cannot create with MS Office.
- Every kid off college knows how to use MS Office, there's no need to call a developer for every small change.
- Endless amount of templates you can just download off the internet.

### 100% Progress

- Use existing Progress 4GL business logic.
- No 3rd party components to install, configure, maintain and no more things that can go wrong. There's no installation, just copy the files and you're ready to go.
- Runs everywhere Progress does. Runs on UNIX/Linux and Windows.
- Compatible with Progress version 9 or higher.

### 100 Times Faster then Current Technologies

The old way of creating MS Office files using ACTIVEX/OLE took minutes to create even moderate sized documents and required launching MS Office in the background that used up large amounts of memory.

The Word and Excel Utilities create even large documents in seconds and because the files are created directly on disk almost no memory is used.

### Generate PDF, HTML, Open Office Files and Many More

Convert MS Office files to PDF, HTML, Open Office and many more file types even future file types as they become available and without the need to make any changes to your code.

Print directly from UNIX/Linux.
